

Fig 1: Natural organization at same target

Stage-4 Figure 1 — What does "natural organization at the same target" mean?

Fig 3: Same target, different trajectories

Stage-4 Figure 3 — Same target, different microscopic trajectories

Fig 5: Organization-aware control

Fig 7: Best actuator depends on values

Stage-4 Figure 7 — Best single actuator depends on what we value

Fig 9: Multi-actuator Pareto (31 subsets)

Stage-4 Figure 9 — All 31 actuator subsets, E-D Pareto ($q=0, T=1$)

Fig 2: Raw displacement vs. excess distortion

Fig 4: Energy-organization Pareto fronts

Stage-4 Figure 4 — Energy-organization Pareto fronts

Fig 6: Terminal configuration

Stage-4 Figure 6 — Terminal configuration

Fig 8: Energy vs. disruption budget

Stage-4 Figure 8 — Energy budget vs. disruption budget

Fig 10: Composition of sparse actuator sets

Stage-4 Figure 10 — Composition of best sparse actuator sets ($q=0, T=1$)
